

Computer Information Systems B.S.

The Computer Information Systems B.S. provides students with the practical knowledge and skillsets in technologies to manage the needs of businesses. The Computer Information Systems degree is similar to Computer Science but covers a broader range of topics in technology and computing systems. Students tend to be more hands on with applications and examine business case studies to understand how technologies fulfill specific purposes. The program includes both a capstone project and internship to gain real-life experiences.

Essential Skills:

Essential skills refer to the knowledge gained from a liberal arts education. They provide a framework to guide students' progress toward their degree, but also prepare students for a broad range of career paths. A recent survey from the Association of American Colleges and Universities (AAC&U) shows employers "strongly agree" that "regardless of a student's field of study" liberal arts skills best prepare students to enter the job market in their career of choice.

1. Critical Thinking:
 - a. Make decisions and solve problems using sound, inclusive reasoning and judgment.
2. Equity & Inclusion
 - a. Demonstrate the awareness, attitude, knowledge, and skills required to equitably engage and include people from different local and global cultures.
 - b. Advocate for inclusion, equitable practices, justice, and empowerment for historically marginalized communities.
3. Information Literacy:
 - a. Gather and analyze information from a diverse set of sources and individuals to fully understand a problem.
 - b. Manipulate information, construct ideas, and use technology to achieve specific goals.
4. Inquiry and Analysis:
 - a. Accurately summarize and interpret information with an awareness of personal biases that may impact outcomes.
 - b. Identify appropriate technology for completing specific tasks.
5. Written and Oral Communication:
 - a. Understand the importance of and demonstrate verbal, written, and non-verbal/body language, abilities.
 - b. Communicate in a clear and organized manner so that others can effectively understand.
