

Psychology B.S.

Psychology has fluent applications in any field of endeavor, including mental health, business, education, and engineering as well as the arts & sciences. The Psychology major develops a basic understanding of why we act the way we do in a variety of scenarios as well as insight into human connection. With a grounding in both research and theory, the psychology major develops critical thinking skills in addition to social/emotional insight.

Essential Skills - Psychology majors develop the skills needed to:

- Apply knowledge in psychology
- Use scientific reasoning and think critically
- Demonstrate ethical and social responsibility in a diverse world
- Communicate (both oral and written communication)
- Show professional development

HONOR SOCIETY & CLUB

The department offers membership in [PSI CHI](#), the International Honor Society for Psychology founded in 1929. The department also hosts a Psychology Club, open to all students, regardless of major.

Employment Information

Popular careers for Psychology majors at the Bachelor's degree level include those with a demand for excellent 'people skills,' including: Human Resources, sales, business management, employee relations, research/data entry. At the master's level, students pursue careers in fields such as: School Psychology, Industrial/Organizational Psychology, Clinical Counseling, Education, and Social Work. Others go on to the doctoral level for careers as Clinical Psychologists, College Professors, researchers, etc.

Representative Employers to the Major Include

Universities, Hospitals, Advertising, Marketing, Human Resources/Personnel Management, Not-for-Profit Agencies, Government, Publishing, K-12 Education
